

# ALARM SYMBOLS™

## DATA SHEET

ALARM SYMBOLS is a software package designed to work with any VISIO or SMARTDRAW 'drag and drop' drawing package. It contains symbols of various alarm equipment and the official symbols for Intruder alarm systems as detailed in the British standard for Intruder alarm systems BS4737 Part 5, section 5.2.

The first stencil has graphic symbols that look like the equipment. Symbols in this stencil include infra red detectors, PIR beams, security lighting, alarm bells, access barriers and control panel's etc. To help draw site layouts symbols for walls, doors, windows and fencing is included.

The second stencil included for BS4737 Part 5, section 5.2 Intruder alarm systems in buildings terms and symbols has over 70 symbols representing a wide variety of detection devices, control panels and signalling devices.

Each symbol has "Custom Properties" so that specific information can be assigned to each individual shape. Information such as model, price and description can be assigned to each symbol and used to create a list of equipment or a quotation.

ALARM SYMBOLS is a perfect accompaniment to our other Symbols and Images drawing software. It is ideal for security professionals who want to produce professional looking system drawings quickly and at a low cost.

Hardware / Software	Requirements
PC & Display	486 33Mhz or higher with VGA or SVGA. Pentium recommended.
PC Ram	32 MB or above
PC Hard drive	280 MB or above free
PC CDROM drive	4x or faster
PC Pointing device	MS mouse or Compatible pointing device
PC Parallel port and printer	1 parallel port for use with Windows compatible printer.
Drawing package required	VISIO 4 and above, order on part number VISIO4.0, VISIO5.0, VISIO2000 or VISIO2002  SMARTDRAW 5 and above.
PC Graphical environment	VISIO 4.0 - MS Windows 3.1 or above VISIO 5.0, VISIO2000/2 - Windows 95, 98, NT, XP SMARTDRAW - Windows 95, 98, NT or XP
