

# MULTIDISPLAY IP™

## DATA SHEET

MULTIDISPLAY IP allows control rooms to have the IP equivalent of the old analogue video wall.

MULTIDISPLAY IP is a software product that enables you to view multi image split screens of pictures from a wide variety of IP devices. MULTIDISPLAY IP is simple to set up and use requiring no specialist computer knowledge.

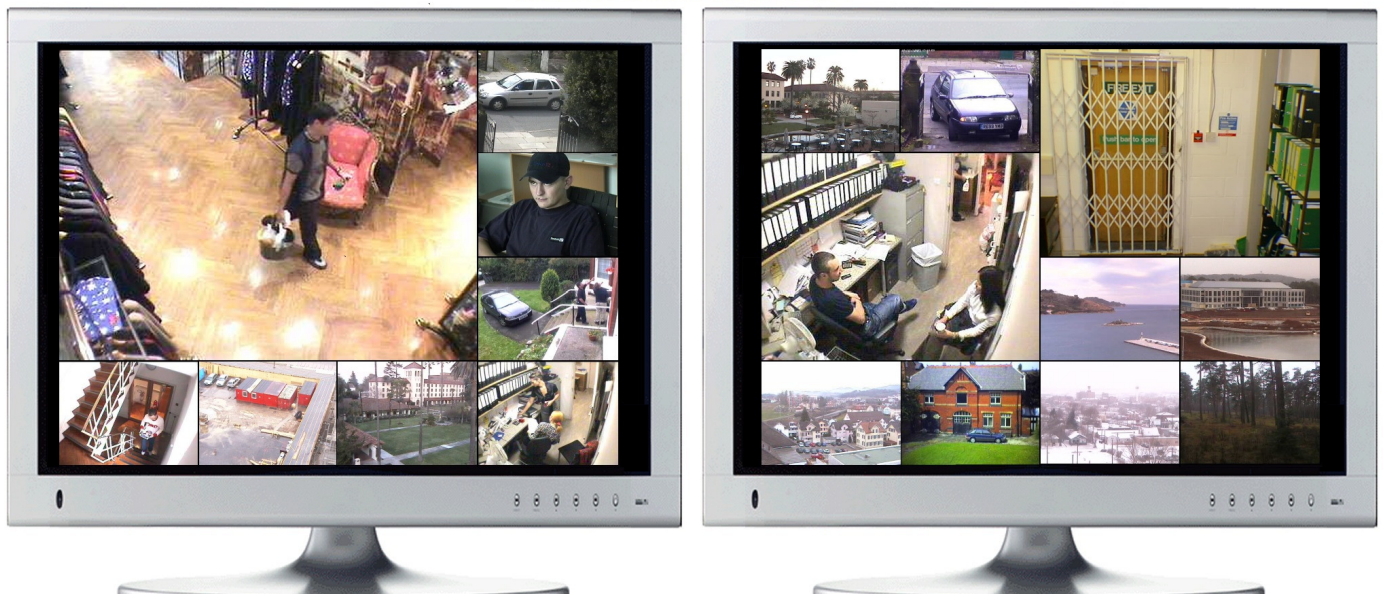

Using Multiple displays such as Plasma's, Projectors or large monitors, one PC running MULTIDISPLAY IP allows clear, uncluttered multiscreens of IP video to be shown on each display.

Different screen layouts can be configured and recalled instantly with a single key press. At setup time every screen window can be resized to make an unlimited number of multiscreens possible.

Once setup and running in display mode no toolbars or buttons obscure the video.

### MULTIPLE MONITOR OPTION

Using CCTV Software's own zoom effect several views from the same mega pixel camera can be shown as individual screens to get the most out of mega pixel camera investment.

Setup toolbar

Control room displays can now enter the IP age.

**FEATURES:**

- Design the split screen you want over multiple displays.
- Works with all the popular makes of IP cameras, servers and DVR's/NVR's.
- Zoom view allow you to view zoomed sections as separate windows.
- No Buttons, toolbars or controls obscuring the video.
- Switch between different display screen layouts with a single keypress.

Hardware / Software	Requirements
PC & Display	Pentium 3 333MHz or higher with VGA or SVGA, Multi monitor output card if you want to use more than on monitor or projector
PC Ram	512 MB or above
PC Hard drive	500 MB or above free. 2 GB or higher recommended.
CD Rom drive	4x or faster
PC control device	Mouse and keyboard
PC USB port	1 USB port
PC Operating system	Windows 98, ME, 2000, NT, XP or Vista
Operation requirements	One MULTIDISPLAY IP required for each PC. The software has no limit on the number of monitors it can support. Use large monitors or projectors on the PC for best results. PC's can have dual or quad VGA output cards to spread your screens over multiple monitors.
PC Network Protocol	TCP/IP Windows network.
Compatible IP cameras/ IP Video Servers & DVR's / NVR's	See our current list on our website for list of compatible equipment. Click here for link: <a href="http://www.cctvsoftware.com/conequip.htm">http://www.cctvsoftware.com/conequip.htm</a>
