TECPLUS ™
DATA SHEET

TECPLUS is a software package that allows PC control of certain products in a CCTV system. It is part of the "PLUS" range of software, which controls most multiplexers and VCRs.
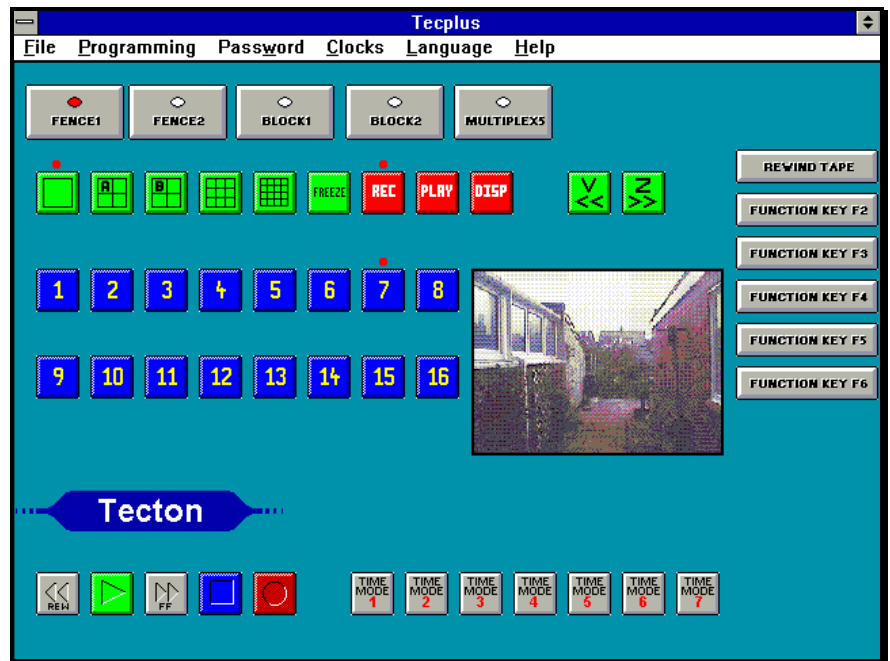

The TECPLUS software specifically controls the Tecton CCTV equipment and most RS232 time lapse VCRs. It can be easily retrofitted in an existing system.

TECPLUS software benefits users of CCTV systems that include 1 or more multiplexers/DVRs and/or 1 or more RS232 VCRs. Its unique features offer key benefits to the CCTV system user and installer.

♦ **Automatic timers ensure potentially crucial recording operations in a CCTV system are controlled automatically, not left in the hands of operators. Key recording and multiplexer settings are software controlled ensuring the CCTV system records correctly at defined times and after defined events. Preventing recording errors is a crucial facility lacking in most CCTV systems.**

♦ **Using software means multiplexers/DVRs and VCRs are not physically required on the control desk. Operators can concentrate on key tasks. Depending on system configurations, further cost savings can be made as TECPLUS removes the requirements for multiple keyboards. Control for the whole CCTV system is in one place, on the PC.**

♦ **Pre-programmed multiplexer/DVR and VCR functions in the software allow immediate set up of the function keys from any of 12 pre-programmed choices. This means accurate and quick set-up, maximising the full extent of the multiplexer's capabilities.**

♦ **Control over a computer network gives multiple users control of the CCTV system. Each PC requiring network control must be running TECplus.**
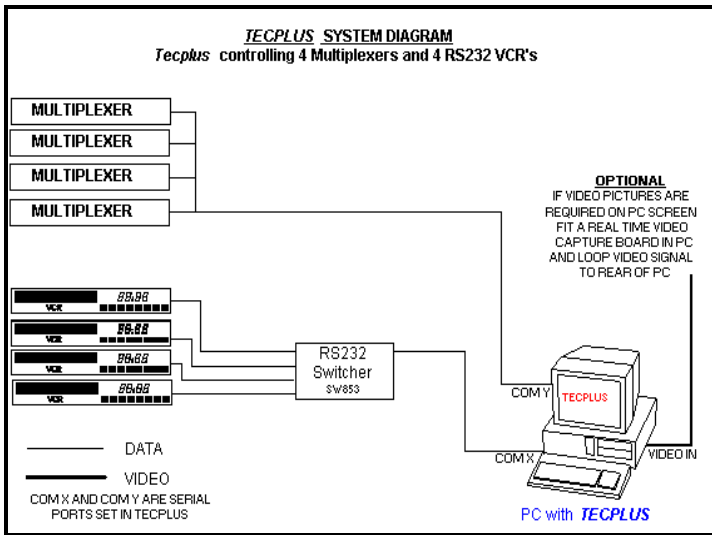

Options:

♦ **SITEMAP software: This add on software package allows selection of cameras by clicking on a camera icon on a map layout. The camera icon can also trigger a function key allowing split screens or VCR functions to also be selected.**
♦ **PC video card: This allows the display of the multiplexer spot monitor output on the PC, reducing space requirements and saving the cost of a monitor.**

♦ **Touchscreen: PC operator control by touchscreen is possible with an optional PC monitor, further simplifying system operation.**

♦ **Camfunction software : This will add telemetry control of most popular PTZ control systems and dome cameras. It links to this software to switch cameras if required.**

TECPLUS is a major breakthrough in improving the operation of CCTV systems.

Hardware / Software	Requirements
PC Ram	256 MB or above
PC & Display	Pentium 3 333Mhz or higher with VGA or SVGA. Pentium 4 or above recommended.
PC Hard drive	500 MB or above free space
PC Floppy drive	3.5" 1.44MB
PC Pointing device	MS mouse, touchscreen or Compatible pointing device
Hardware key port	1 parallel port or USB port, add –USB to part code if you want USB
PC RS232 Communications ports	1 mouse / Touch Screen port. 1 serial port for every eight Multiplexers . 1 serial port for every eight RS232 VCR's.
PC Operating System & Network	Windows 95, 98,NT,2000, XP or Vista with TCP/IP protocol for network operation
RS232 VCR's or digital recorders New VCR's and digital recorders being added all the time.	MITSUBISHI 5600BRS/R6000S PANASONIC AG 6730/6760/6040 GYYR TLC1800TDS / 2100 JVC BRS 920/925, BR9020, SR-S970, SRL910 SONY SVT-1000/S3050/5050/L230, HSR-1 SANYO TLS-2100, DTL-4800, TLS-9960 VISTA VVR-S480HR, VVR-168HR HITACHI VTL2500E/3000 PHILIPS LTC RANGE All above with RS232 option
RS485 VCR's or digital recorders	SANYO SRT-6000
Multiplexer or DVR	TECTON KRAMPLEX multiplexer range TECTON DRAX multiplexer range TECTON MINIPLEX multiplexer range TECTON DARLEX DVR range
