# VCL Images™ DATA SHEET

VCL IMAGES is a software package designed to work with the VISIO "drag and drop" drawing package. It contains digital photographic images for all the CCTV equipment manufactured by VCL. Each product has been digitally photographed in high resolution then converted to the Visio stencil format. This allows the images to be dragged and dropped quickly and easily on to the drawing page. VCL IMAGES features CCTV equipment including various microspheres, mountings and telemetry control equipment.

Model numbers have been assigned to each image and prices can also be assigned to allow shape reports. The shape reports calculate the cost of a drawn system and list all the separate items of equipment which is used.

The Images display an exact image of the model and can be used to produce individual data-sheets. VCL IMAGES is a perfect accompaniment to our Symbols software. VCL IMAGES is ideal for CCTV professionals who regularly use VCL equipment and want to produce quick, professional looking CCTV system drawings at low cost.

Hardware / Software	Requirements
PC & Display	**486 33Mhz or higher with VGA or SVGA.** **Pentium recommended.**
